

STERLING
TRUCKS

Help is on the Way

Acterra, with a **Class 5 – 8 operating range**, is more than just a truck. It's an entire medium-duty truck line that handles like a middleweight, but works like a heavyweight.

In any towing situation imaginable, the best way to say help is on the way is to say Acterra is on the way.

Acterra is a medium-duty favorite among drivers...for **power, cab room, visibility and ease of operation**. Its impressive wheel-cut angle results in a smaller turning radius for better maneuverability around congested areas.

With more frame, exhaust, and suspension choices, plus an expanded range of fuel tank offerings, and factory installed Muncie or Chelsea power take offs, it's engineered to be body builder friendly and handle the **most severe towing applications**.

And now, with the availability of the **Crew Cab**, Acterra is even more versatile.

The Acterra Crew Cab is 15" longer on the inside — **with 12" more rear seat leg room** — than any market competitor. The flat floor and concave roof combine to provide ample head and leg room to easily accommodate five people.
